

Once in Time, Now in Space

Video (What you see/Shot List/B Roll)	Audio (What you will say/Script)
opening introduction clip from nasa library (nasa library) Opening credits, name/school/year	Goddess of the moon, sister of apollo. Combined makes a powerful being a goddess of great strength. This is Artemis.
Shots of the crew, demos of the rockets, and shots of teams working on the projects(nasa library) Shots of Artemis 1 and other space missions, showing building process,launching, and landing.(nasa library)	The first big leap of this Nasa run program has already begun, with Artemis I. A 2022 uncrewed flight into space. Unless you count Snoopy and Shaun of course, the mini figures who made their way almost 65 thousand miles past the moon with the new launch system in place.
Shots of the crew, demos of the rockets, and shots of teams working on the projects(nasa library)	With Artemis II, we will be taken through deep space, with the mission set for April 2026. The crew, a mix of people from multiple STEM careers, proves that their CTE jobs can provide a great importance, even if not directly tied to space.
Shots of deep space, rockets leaving the atmosphere, astronauts in rockets. Shots of the moon, the first moon landing, rocket launches, steps on the moon, and more crew work from earth.(nasa library)	It will then be time to finally reach the lunar surface as we venture into the next big step of this process . Artemis III. In the footsteps of her sister Apollo, a team estimated for departure in 2027 which will build off of the first lunar landing in 1969. The thirty day mission will prove to be a way to understand more about the moon's surface along with its

	ice and water. Artemis IV and V, the final two planned missions will carry out the 8th and 9th lunar landings ever following the one from Artemis III.
Shots of apollo missions	This mission will be a turning point in space exploration and space history. Join NASA for the journey, as Artemis who was once just a figure of time, will now be taking us into space.
